

PLAN OF LECTURES
of propaedeutics of internal diseases
for third-year students of foreign student's faculty (bilingual program)

№	Topic of the lecture	Duration
Lecture 1.	Introduction to propaedeutic therapy. Brief history of internal diseases. Questioning of the patient.	2
Lecture 2.	General examination of the patient.	2
Lecture 3.	Symptoms of respiratory diseases.	2
Lecture 4.	Laboratory and instrumental methods of examination of patients with respiratory diseases. Syndromes of respiratory diseases.	2
Lecture 5.	Examination of patients with cardiovascular diseases.	2
Lecture 6.	Heart auscultation. Hearts sounds.	2
Lecture 7.	Heart auscultation. Heart murmurs.	2
Lecture 8.	Instrumental methods of examination of cardiovascular system. Electrocardiography.	2
Lecture 9.	Instrumental methods of examination of cardiovascular system. Ultrasound. Holter and blood pressure monitoring.	2
Lecture 10.	Methods of examination of patients with gastrointestinal diseases.	2
Lecture 11.	Symptoms of liver and biliary tract diseases.	2
Lecture 12.	Symptoms of kidney and urinary system diseases.	2
Lecture 13.	Methods of examination of patients with blood system diseases.	2
Lecture 14.	Methods of examination of patients with endocrine system diseases.	2
Lecture 15.	Heart arrhythmias. Extrasystole.	2
Lecture 16.	Atrial fibrillation. Heart blockades.	2
Lecture 17.	Acute rheumatic fever. Infective endocarditis.	2
Lecture 18.	Valvular heart diseases.	2
Lecture 19.	Coronary artery disease.	2
Lecture 20.	Myocardial infarction.	2
Lecture 21.	Arterial hypertension.	2
Lecture 22.	Heart failure.	2
Lecture 23.	Bronchitis. Bronchial asthma. Chronic obstructive pulmonary disease.	2
Lecture 24.	Chronic gastritis. Peptic ulcer disease.	2
Lecture 25.	Pancreatitis. Cholecystitis. Hepatitis.	2
Lecture 26.	Liver cirrhosis.	2
Lecture 27.	Glomerular diseases. Tubulointestinal diseases.	2
Lecture 28.	Anemia. Hemorrhagic diseases.	2
